Sarasota Plastic Surgeon Becomes the Nation's Most Requested Arm Lift Specialist as Patients Travel Globally for His Signature Technique

SARASOTA, FL — February 2026 — Patients are traveling thousands of miles to Sarasota for one specific procedure and one specific surgeon.

Florida Plastic Surgery & Med Spa announced today that Dr. Kristopher Hamwi ended 2025 as the number one most contacted doctor in the United States for arm lift procedures on RealSelf, one of the largest online communities for cosmetic and aesthetic medicine. The ranking is based entirely on patient-initiated inquiries, reflecting significant national and international demand for his specialized approach to arm contouring.

Known for a highly specialized method that differs from traditional brachioplasty, Dr. Hamwi is frequently sought out by patients who value precision, consistency, and natural looking results. Each procedure is carefully customized to the individual rather than performed using a standard, one size fits all technique, allowing for greater control, smoother contours, and more predictable outcomes.

That reputation has quietly transformed his Sarasota practice into a destination for patients worldwide. In addition to individuals traveling from across the United States, the practice regularly welcomes patients from the United Kingdom, the British Virgin Islands, Japan, and other countries who plan entire trips around having surgery with Dr. Hamwi.

“This recognition is especially meaningful because it comes directly from patients,” said Dr. Hamwi. “People want a thoughtful, personalized approach and results that look natural and balanced. My focus has always been on delivering arm lift surgery in a way that feels safer, more precise, and consistently reliable.”

“At our practice, this procedure is truly specialized,” said Joann Rucker, Director of Operations. “Dr. Hamwi has dedicated years to perfecting a very specific method for arm lifts, and patients recognize the difference immediately. Many are willing to travel

internationally specifically for his care because his results simply aren't what they see elsewhere.”

Florida Plastic Surgery & Med Spa, located in Sarasota, Florida, serves patients locally, nationally, and globally. Before and after results can be viewed at www.floridaplasticsurgery.com/photo-gallery/brachioplasty-arm-lifts/
